Orlando, FL · Open to Remote or Relocation

ray.a.jose@gmail.com · 425-233-5642

LinkedIn: [linkedin.com/in/rayjose](https://www.linkedin.com/in/rayjose) · GitHub: github.com/rayajose

Senior Technical Writer specializing in API documentation, data systems, and cloud-based architecture.

Experienced in designing and documenting REST APIs, ETL pipelines, and secure backend systems within AWS environments. Proven ability to translate complex engineering workflows to include data ingestion, processing pipelines, and distributed systems into clear, developer-focused documentation.

Core Competencies

Languages & Frameworks: Python, Java, FastAPI, SQL

API Development: REST APIs, OpenAPI/Swagger, API authentication, pagination, filtering

Cloud & Infrastructure: AWS ECS (Fargate), RDS (PostgreSQL), S3, ECR, ALB

Data & ETL: Data ingestion pipelines, ETL processing, CSV parsing, data normalization

Databases: PostgreSQL, SQLite

DevOps: Docker, container deployment, environment configuration

Security & Compliance: PCI DSS, Incident Response, Disaster Recovery, Business Continuity, Audit Documentation

Structured Content & Publishing: DITA, XML, Markdown, Content Modeling, Single-Sourcing Architectures

Professional Experience

Security Officer: The Walt Disney Company — Orlando, FL · 07/2025 – Present

- Maintain operational security within a high-volume enterprise environment supporting thousands of daily guests
- Respond to incidents and enforce safety protocols in time-sensitive situations

Senior Technical Writer: Ekaria LLP — Redmond, WA · 05/2014 – 12/2024

- Authored REST API documentation supporting partner integrations for product catalog access and order processing
- Produced developer-facing documentation including endpoint references, authentication workflows, and integration guides
- Collaborated with engineering teams to document API behavior, request/response models, and error handling patterns
- Enabled onboarding of 30+ partner integrations through reusable API documentation and workflows
- Authored and maintained PCI DSS-aligned security documentation supporting audits and compliance initiatives
- Developed Incident Response, Disaster Recovery, and Business Continuity plans for regulated e-commerce systems

- Developed Perl scripts to transform and validate large-scale product catalog feeds
- Maintained structured documentation architecture supporting content reuse and multi-channel publishing

Content Architect: Volt Technical Resources — Redmond, WA · 03/2011 – 12/2013

- Designed XML schema mappings and content conversion strategies for structured legal systems
- Authored technical specifications and transformation rules for engineering teams

Production Engineer: Microsoft — Redmond, WA · 02/2008 – 02/2011

- Managed build and deployment workflows for localized help systems across 30+ languages
- Authored XML schema (XSD) documentation for structured content systems

Technical Projects

Partner Catalog API (Cloud Data Ingestion Platform)

GitHub: <https://github.com/rayajose/partner-catalog-api>

Docs: <https://rayajose.github.io/partner-catalog-api>

- Designed and implemented a **cloud-based data ingestion pipeline** for partner product catalogs using **FastAPI, PostgreSQL, and AWS (ECS, RDS, S3)**
- Built a **job-driven ETL system** that extracts CSV data from S3, transforms and validates records, and loads normalized data into PostgreSQL
- Developed **RESTful API endpoints** supporting feed ingestion, job orchestration, and product querying with filtering, sorting, and cursor-based pagination
- Implemented **pipeline observability** by exposing job status, ETL results, and ingestion metadata through API endpoints
- Architected **separation of raw and processed data layers** (S3 → ETL → RDS), enabling reprocessing and auditability
- Containerized application with Docker and deployed to **AWS ECS Fargate behind an Application Load Balancer**
- Authored comprehensive **developer documentation (MkDocs)** including API reference, workflows, and system architecture

Education

Master of Business Administration: International Business — University of Miami

Bachelor of Arts: Technical Writing — University of Central Florida

Military Service

United States Marine Corps

Non-Commissioned Officer · Automotive Maintenance Technician
