Senior Technical Writer with 15+ years of experience documenting enterprise systems, partner integrations, and security/compliance environments. Background spans structured content architecture, XML-based publishing systems, API documentation, and large-scale e-commerce platforms.

Led PCI DSS audit programs, authored security policies, and supported partner onboarding and data integration workflows across complex systems. Designed and documented a partner-facing API and data ingestion platform to extend hands-on experience with modern API workflows, ETL processing, docs-as-code practices, and cloud deployment.

Focused on creating documentation that enables implementation, reduces ambiguity, and supports real-world system use.

Experience

Security Officer, The Walt Disney Company Orlando, FL | 07/2025 – Present

Current transitional employment while pursuing senior technical writing opportunities.

Senior Technical Writer / Engagement Manager Ekaria LLP, Redmond, WA | 05/2014 – 12/2024

- Authored and maintained cybersecurity policies and standards in compliance with PCI DSS, covering network, application, information security domains, incident response, disaster recovery, and business continuity plans
- Led end-to-end PCI DSS audit lifecycle as primary point of contact for third-party auditors, including pre-audit assessment, evidence collection, and audit execution; achieved successful audits annually with zero findings in the last three years.
- Mapped system controls to PCI DSS requirements, identified documentation gaps, and drove remediation across policies, procedures, and supporting artifacts.
- Produced implementation-focused technical documentation for e-commerce integration platforms, including internal API references, partner data specifications, onboarding guidance, and operational workflows supporting product ingestion and order automation systems.
- Defined and enforced product catalog data standards across partner feeds, performing iterative data reviews and remediation cycles to ensure successful ingestion; supported integrations ranging from SMB platforms to large retailers with product catalogs exceeding 1M records.
- Developed XSLT/XPath transformations and structured content workflows to normalize and process product data for downstream systems.
- Utilized Oxygen XML Editor and DITA/XML to enable single-source, multi-channel publishing (PDF, HTML).
- Served as technical liaison for 30+ external partners, leading cross-functional onboarding and integration efforts without direct reports.
- Facilitated B2B integrations across multiple ingestion and order automation pathways (FTP feeds, APIs/web services, and automated order placement systems) and collaborated with partners to establish reliable data delivery solutions.

Content Architect, Volt Technical Resources Redmond, WA | 03/2011 – 12/2013

- Contributed to a large-scale XML content migration initiative supporting the platform modernization of LexisNexis' legal document system.
- Analyzed legacy XML structures and defined node-level mapping strategy using XPath, translating source schemas to target models.
- Designed and proposed RelaxNG schema modifications to resolve structural gaps and improve compatibility across content models.
- Authored detailed Conversion Instructions (CIs) for developers to implement transformation logic and ensure accurate content migration.

Production Engineer, Microsoft

Redmond, WA | 02/2008 – 02/2011

- Served as primary administrator for a TFS-based content management system supporting the Windows 7 Help platform, managing users, security, team projects, and build workflows.
- Owned XML content infrastructure, including design and maintenance of the XSD authoring schema for the Windows 7 Help system.
- Built solutions for content migration, transformation, and validation using XSLT, PowerShell, and C#, improving reliability and efficiency of content workflows.
- Developed XML schemas, XSL transformations, and validation tooling used by documentation teams; provided technical support for authoring and publishing systems (“XML subject matter expert”).

Technical Projects

Commerce Integration API (Cloud-Native Integration Platform)

GitHub: <https://github.com/rayajose> | Docs: <https://rayajose.github.io/writing-portfolio>

- Designed and documented a cloud-native API platform for ingesting, validating, processing, and querying external commerce data.
- Modeled a production-style ingestion architecture with asynchronous job workflows, ETL processing, and separation of raw and processed data layers.
- Implemented RESTful APIs using FastAPI with API key authentication supporting partner-driven integration workflows.
- Integrated Amazon S3 and PostgreSQL to support scalable ingestion, transformation, analytics, and retrieval workflows.
- Deployed containerized services to AWS using ECS Fargate, Application Load Balancer (ALB), RDS PostgreSQL, ECR, and S3.
- Authored developer-focused documentation using a docs-as-code workflow with Markdown, MkDocs Material, OpenAPI/Swagger, and GitHub.
- Designed developer-focused onboarding and integration workflows to support self-service implementation and reduce partner onboarding friction.
- Created API reference documentation, integration guides, architecture documentation, operational workflows, and troubleshooting content.
- Validated ingestion and query workflows using Swagger UI, curl, and end-to-end integration testing.

Technical Skills

APIs & Developer Platforms: REST APIs, OpenAPI/Swagger, API documentation, integration workflows, data ingestion systems

Cloud & Infrastructure: AWS (ECS, RDS PostgreSQL, S3, ECR, ALB), Docker, cloud-native deployment concepts

Docs-as-Code & Tooling: Markdown, GitHub, MkDocs Material, Swagger UI, Oxygen XML Editor

Programming & Scripting: Python, Java, C#, PowerShell, SQL, XSLT

Data & Integration: ETL concepts, data modeling, feed processing, content normalization, XPath, RelaxNG

Structured Content & XML: DITA, XML, XSD, structured authoring systems

Security & Compliance: PCI DSS, incident response, disaster recovery, business continuity

Education

Master of Business Administration: International Business — University of Miami

Bachelor of Arts: Technical Writing — University of Central Florida

Military Service

United States Marine Corps

Non-Commissioned Officer · Automotive Maintenance Technician

Honorable Discharge
