Orlando, FL · Open to Remote or Relocation

ray.a.jose@gmail.com · 425-233-5642

LinkedIn: [linkedin.com/in/rayjose](https://www.linkedin.com/in/rayjose) · GitHub: github.com/rayajose

Principal Technical Writer specializing in API documentation, enterprise integrations, and data-driven systems.

Experienced in designing and documenting REST APIs, ETL pipelines, and backend systems, with hands-on experience deploying and documenting cloud-based applications on AWS. Proven ability to translate complex engineering workflows—including data ingestion, processing pipelines, and distributed systems—into clear, developer-focused documentation.

Core Competencies

Languages & Frameworks: Python, Java, FastAPI, SQL

API Development: REST APIs, OpenAPI/Swagger, API authentication, pagination, filtering

Cloud & Infrastructure: AWS (ECS Fargate, RDS PostgreSQL, S3, ECR, ALB)

Data & ETL: Data ingestion pipelines, ETL processing, CSV parsing, data normalization

Databases: PostgreSQL, SQLite

DevOps: Docker, container deployment, environment configuration

Security & Compliance: PCI DSS, Incident Response, Disaster Recovery, Business Continuity

Structured Content & Publishing: DITA, XML, Markdown, Content Modeling, Single-Sourcing Architectures

Professional Experience

Security Officer: The Walt Disney Company — Orlando, FL · 07/2025 – Present

- Maintain operational security within a high-volume enterprise environment supporting thousands of daily guests
- Respond to incidents and enforce safety protocols in time-sensitive situations

Senior Technical Writer: Ekaria LLP — Redmond, WA · 05/2014 – 12/2024

- Led documentation for partner-facing REST APIs supporting product catalog access and order processing
- Produced developer documentation including endpoint references, authentication workflows, and integration guides
- Partnered with engineering to document API behavior, request/response models, and error handling patterns
- Enabled onboarding of 30+ external partners through reusable documentation and integration workflows
- Authored PCI DSS-aligned security documentation supporting audits and compliance initiatives
- Developed incident response, disaster recovery, and business continuity plans for regulated systems

- Built Perl-based data transformation scripts to validate and process large-scale product catalog feeds
- Maintained structured documentation architecture enabling content reuse and multi-channel publishing

Content Architect: Volt Technical Resources — Redmond, WA · 03/2011 – 12/2013

- Designed XML schema mappings and content conversion strategies for structured legal systems
- Authored technical specifications and transformation rules for engineering teams

Production Engineer: Microsoft — Redmond, WA · 02/2008 – 02/2011

- Managed build and deployment workflows for localized help systems across 30+ languages
 - Authored XML schema (XSD) documentation for structured content systems
-

Technical Projects

Partner Catalog API (Cloud Data Ingestion Platform)

GitHub: <https://github.com/rayajose/partner-catalog-api>

Docs: <https://rayajose.github.io/partner-catalog-api>

- Designed and documented a partner-facing API platform for ingesting, processing, and querying product catalog data
 - Implemented a job-driven ETL pipeline that extracts CSV data from S3, validates and transforms records, and loads normalized data into PostgreSQL
 - Developed REST API endpoints supporting feed ingestion, job orchestration, and product querying with filtering, sorting, and cursor-based pagination
 - Exposed system behavior through API-driven observability, including job status tracking, ETL results, and ingestion metadata
 - Designed a layered data architecture (S3 → ETL → RDS) to support reprocessing, traceability, and auditability
 - Containerized the application with Docker and deployed to AWS ECS Fargate behind an Application Load Balancer
 - Authored end-to-end developer documentation (MkDocs), including API reference, workflows, and architecture
-

Education

Master of Business Administration: International Business — University of Miami

Bachelor of Arts: Technical Writing — University of Central Florida

Military Service

United States Marine Corps

Non-Commissioned Officer · Automotive Maintenance Technician

Honorable Discharge
